

# TAMPERGUARD™

Tamper evident security solutions

## Security Tape for Bags

In a rapidly changing business environment, innovation is what makes the difference.

Some suppliers wait for their customers to come up with problems to find solutions.

Not us. Our job as your innovation partner is to see to the evolution of your business and deliver solutions before you even thought you'd need them.

Whether it is to improve the tamper-evident technology of your security bags, boost your operational efficiency, or compete with lower prices, our security bag tapes help you maintain a leading edge over your competitors.

Our proven track record includes being the first to bring thermochromic ink to the market, develop tamper-evident tape that voids at all temperatures, include water-soluble ink directly on the adhesive, develop easy to fold silicone liners, and produce longer length rolls.

Fully customized, our security bag tapes aim to stimulate market demand and create new pockets of growth—for you and your customers.

### Key benefits for security bag manufacturers

Sustained competitive advantage

15–20% additional equipment uptime with larger rolls

Very competitive price/performance ratio

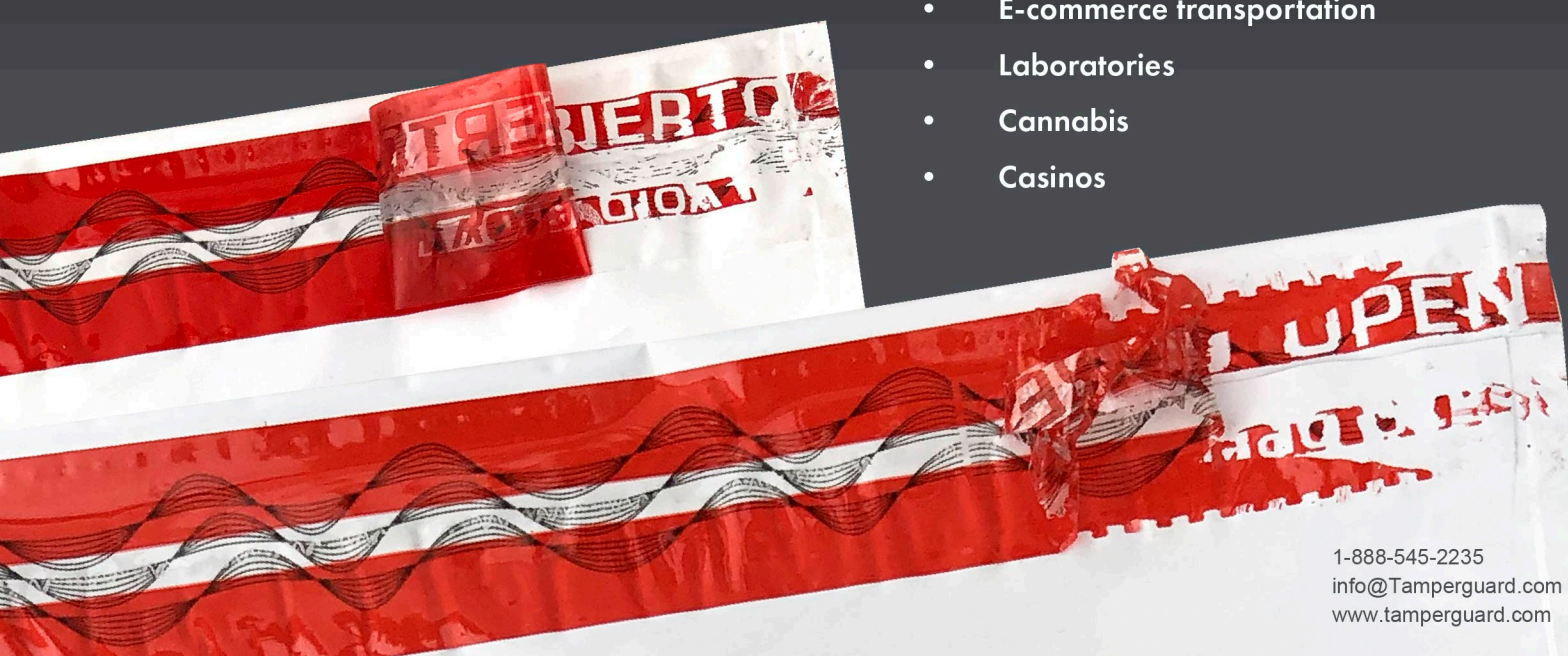

Delivery you can rely on

Value-added services to help you grow

### Industries served

# The Tamperguard Advantage

**Full range of custom options (materials, colour, graphics)**

**Void message visible from -80 C**

**(-112 F) to +80 C (175 F)**

**Clear void graphics**

**Thermo inks positioned between the film and adhesive**

**Edge-to-edge adhesive**

**Security face cuts**

**Water soluble ink printed on the adhesive**

**Roll length: up to 2000-metre flat rolls or 10 000-metre spools**

**Tape will not void from handling as PE tape can**

**Tape will void when bag is frozen from the back**

**Silicone liner can be perforated for easy folding**
